

## RTCRT Probe O-ring Replacement

### ASSEMBLY INSTRUCTION:

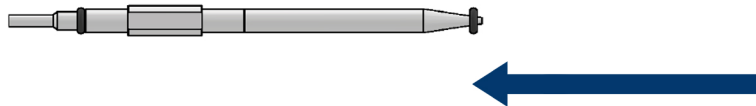

1. Gather the pin/probe, cone and a new o-ring.

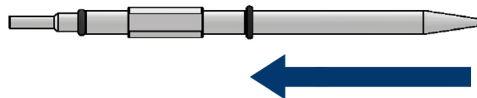

2. Align the cone with the end of the probe where the o-ring needs to be replaced.

3. Position the new o-ring onto the cone.

4. Gently push the o-ring from the cone to the midpoint of the pin/probe.

5. Once correctly positioned, detach and set aside the cone.

*\*If another o-ring replacement is necessary on the opposite side, flip and repeat these steps.*
